Baylor College of Medicine/ Texas Children's Hospital

Department of Pediatrics

Section of Adolescent Medicine / Center for Childhood Obesity Practicum

Houston, TX

Contact: Beth Garland, Ph.D.

Phone: (832) 822-1793

Website: bhgarlan@texaschildrens.org

Primary Populations Served: The Section of Adolescent Medicine at Texas Children's Hospital serves adolescents and young adults (10 – 24 y.o) in both inpatient and outpatient settings. This practicum is specific to adolescents with comorbid mental health concerns and obesity (or are overweight) who present for outpatient therapy. Patients present with various symptoms and concerns including (but no exclusive to): eating disorders (specifically, binge eating), depression, anxiety, chronic illness, family conflict and family of origin issues.

Duration: The practicum entails approximately 15 - 20 hours/week during the Fall/Spring semesters. Approximately 50-70% time will be spent in clinic with Dr. Garland and didactics; 30-50% will be spent in research-related activities.

Clientele/Experience Gained: The section offers interdisciplinary treatment in medicine, nursing, nutrition, and psychology to patients who seek services for various presenting problems. Possibilities as a psychology practicum student could include:

- Providing individual therapy
- Providing family therapy
- Co-facilitating group therapy

CPSY Approved Field Practicum Sites

- Working in an interdisciplinary team
- Participating in team conferences
- Conceptualizing cases and assisting with treatment plans for patients, including gaining knowledge of certain self-report measures.
- Collaborating with various disciplines to develop integrated treatment goals
- Participating in research-related projects specific to the Adolescent Medicine Section and the Center for Childhood Obesity
- Participating in didactics specific to Adolescent Medicine, Child Psychology, and/or Texas Children's Hospital (Pediatric Grand Rounds)

Additional Information: In addition to clinical experience, this practicum also entails 30-50% of time devoted to research-related activities in the section, including assessment scoring, data entry, and help with data collection. Collaboration with Dr. Garland and other members of the Adolescent Medicine team on a departmental or conference poster presentation is highly encouraged.

Baylor College Of Medicine/ Texas Children's Hospital
Department Of Pediatrics
Section Of Adolescent /Adolescent Medicine Practicum

Contact: Jean Doak, Ph.D.

Phone: (832) 822-3661

Email: jsdoak@texaschildrenshospital.org

Clientele/Experience Gained: The Section of Adolescent Medicine at Texas Children's Hospital serves adolescents and young adults (10 – 24 y.o) in both inpatient and outpatient settings. The section offers interdisciplinary treatment in medicine, nursing, nutrition, social work and psychology to patients who seek services for various presenting problems. As a psychology practicum student, you will be able to further develop skills in: providing individual therapy, providing family therapy, co-facilitating group therapy, working in an interdisciplinary team, participating in team conferences, conceptualizing cases and assisting with treatment plans for patients, collaborating with various disciplines to develop integrated treatment goals.

Participating in leadership didactics with trainees and faculty from various disciplines to promote adolescent health through LEAH (Leadership Education in Adolescent Health)

Patients present with various symptoms and concerns including (but no exclusive to): eating disorders, depression, anxiety, chronic illness, family conflict and family of origin issues.

Duration: Fall. The practicum entails approximately 15 - 20 hours/week during the Fall/Spring semesters suited for those who are seeking a third practicum experience. It will consist of inpatient and outpatient responsibilities 2.5 days/week along with didactics .5 days/week.

Ben Taub General Hospital Psychiatry Service
Houston, TX

Clientele/Experience Gained: Inpatient/Outpatient Adults, some opportunities to work with children and adolescents; Individual and group therapy. Assessments (cognitive and personality).

Duration: Typically 16 hrs. a week, with a maximum of 24 hrs. a week, can start in the Fall

Additional Info: The practicum is an individually-tailored experience, depending on the needs and interests of the student. Each student selects a core number of activities from among the wide variety of opportunities available. Beginning students (i.e., those in their first external practicum year) generally conduct inpatient and outpatient assessments, co-lead a psychotherapy group, and provide individual psychotherapy to a small number of patients (2-4). Advanced students may conduct assessments, provide individual psychotherapy, and serve as a primary clinician in the Intensive Outpatient Program for patients with co-morbid Axis I and Axis II diagnoses. Students with an interest in child, adolescent, and family therapy may spend time in one or more of the child and adolescent clinics, providing therapy and conducting brief assessments.

Charis Psychological Associates
Houston, TX

Contact: Dr. Pauline Clancy, Ed.D. (Licensed Psychologists)

Phone: (713) 777-8633

Website: www.cishouston.org

Phone: (713) 654-1515 (central office)

Contact: Harriet Arbey, Ph.D. (in charge of mental health services)

*Note: there are about 98 schools within the system, contact the main number to inquire about more specific information. Inquire about supervisor level (e.g., LPC, Licensed Psychologist).

Clientele/Experience Gained: Children and Adolescents, Male and Female, Assessment, home visits with a caseworker, crisis intervention, individual or group supportive guidance, mentor and tutor students.

Duration: Varies by site; Fall, Spring

Additional Information: The mission of Communities In Schools Houston (CIS) is to provide and to coordinate student assistance services at the school campus in order to best meet the physical and emotional needs of at-risk students and to empower these students to remain in school.

- Is a non-profit program that has been successfully providing social services to children in Houston's schools since 1979
- Works directly in the schools, with 104 programs in four Houston-area school districts (Houston, Alief, Spring Branch and Fort Bend); CIS has an office on each campus, staffed by a project manager
- Serves children deemed at-risk for dropping out of school. They come from homes of extreme poverty, many live with single parents and guardians, or in foster homes
- CIS serves elementary, middle- and secondary schools all over the Houston area. In collaboration with the CIS staff trainees have choice among available schools.
 - CISH Six Core Services
 - Supportive Guidance
 - Parent Involvement
 - Educational Enhancement
 - Pre-employment/Employment Assistance
 - Health and Human Service Linkages
 - Cultural Enrichment

CPSY Approved Field Practicum Sites

Harris County Psychiatric Center

Houston, TX

Location: W. Leland Anderson Campus
Texas Medical Center
2800 South MacGregor Way
Houston, Tx 77021

Clientele/Experience Gained: Psychiatric services to adults, adolescents, and children, both inpatient and outpatient. Various units including adult, adolescent, child, and geriatric. Provide assessment, individual therapy, group services. Strong emphasis on assessment.

Duration: Fall; 16 hrs. a week, spread over 2-3 days. At least two of those days should be consecutive.

Additional Information: HCPC is staffed by psychiatrists and psychologists of the UT Medical School faculty who supervise the patient care provided by psychology and psychiatry residents, psychology practicum trainees and medical students. Prac student activities may include the following: attending treatment team rounds, participation in admission screening assessments and referred psychological evaluations, feedback and consultation with treatment teams, patients, and parents, and group therapy co-leadership. Research projects are also a possibility. There are lots of assessment experiences available.

UT-Harris County Psychiatric Center

Houston, TX

Contact: Patricia M. Averill, Ph.D.
(Adult Services, UT-HCPC, 3-A25)
(713) 741-3951

Samoan C. Johnson, Ph.D.
(C/A Services, UT-HCPC, 1-B60)
(713) 741-3864

Clientele/Experience Gained: There are 8 adult inpatient units, which include 7 general adult units and a detox unit. The length of stay on these units is approximately 7-10 days. For the Child/Adolescent Service there is one general child/adolescent (3-17 years) unit, and one juvenile (13-17 years) unit. The length of stay for the juvenile unit is approximately 6 weeks. For the other two units it is 7 to 10 days.

Child/Adolescent Experiences: On the Child/Adolescent Service, psychology practicum students participate in the following clinical activities: attendance to morning patient staffings (i.e., treatment team rounds); admission screening assessments and referred psychological evaluations; feedback and consultation with treatment teams, patients and parents; group therapy (focused on anger management, coping skills development) co-leadership with a psychological

associate; and limited experiences for referred individual therapy or staff talks. Attendance to Grand Rounds at UTMSI and observation at the UT-HCPC probate court are also training enrichment opportunities. Participation in on-going research that is integrated with clinical activities is an option as well.

Adult Experiences: Practicum students have the opportunity to provide individual and group therapy, as well as psychological assessment. Individual therapy is brief and focused (given the short length of stay) and utilizes cognitive-behavioral theory and techniques. Typically the student may see a patient for 3-4 sessions. Group therapy is co-led with a master's level LPC or Social worker with ACP licensure. These groups tend to be focused on management of mental illness, coping skills, anger management, or dual diagnosis. Assessment may include cognitive (this may include intellectual and some neuropsychological assessment), personality and achievement components, depending on the nature of the question. The student is involved in both administration and report writing. In addition to these active components of the experience, student have the opportunity to sit on rounds, provide verbal reports on assessment results to the treatment team and write notes in the chart. In addition, since we have the probate court at UT-HCPC, students have the opportunity to watch commitment hearings. Finally, there are opportunities for practicum students who are interested in being involved in research projects.

Duration: Trainees can start in the Fall.

Additional Info: The UT Harris County Psychiatric Center is a 250-bed acute care inpatient mental health facility providing psychiatric services to adults, adolescents and children. It is accredited by JCAHO.

Psychiatrists and psychologists of the UT Medical School faculty supervise the patient care provided by psychology and psychiatry residents, psychology practicum trainees and medical students working at UT-HCPC. Nursing students and social work trainees also obtain training experience at UT-HCPC. Multidisciplinary treatment teams utilize a biopsychosocial approach to patient care. The patient population is "ethnoculturally" diverse and individuals are admitted with presenting problems covering a broad spectrum of severe psychiatric disorders and developmental disabilities.

The application includes the student's contacting the psychology faculty member who supervises training on the inpatient service of interest (Dr. Patricia M. Averill, adult services or Dr. Samoan C. Johnson, child/adolescent services). The supervisor and the applicant will arrange an interview to address training background, interests, training goals and the supervisor's training expectations. Then the supervisor and applicant will make a decision about whether UT-HCPC practicum is a good fit for the student. Students should contact the supervisor at least 6 weeks prior to the term they wish to begin the practicum.

Typically, practicum students are encouraged to commit to the child/adolescent or the adult area. If a student desires practicum experience in both areas, he/she can work on each service for a period of no less than one academic term. Simultaneous involvement in the child/adolescent and adult areas is not an option because continuity and breadth of learning experience would be compromised.

CPSY Approved Field Practicum Sites

In order to maximize the benefits of the UT-HCPC practicum experience, applicants should complete all courses pertaining to theory, psychopathology, psychotherapy, test construction and psychological assessment (i.e., administration and scoring of intelligence/cognitive, achievement and personality instruments and some experience with interpretation of test results).

Psychological intervention experience is preferred (i.e. students have completed at least one practicum experience or completed an experience at their departmental clinic). Students who are interested in participating in assessment activities should plan to commit a minimum of 16 hours per week to the practicum during regular working hours (8am to 5pm) for any three or four days, Monday through Friday. At least two of the student's working days at HCPC should be consecutive. Before the students can begin participation in clinical and/or research activities at UT-HCPC, the following documentation must be submitted: an inter-institutional agreement between a student's university and the UT-Houston Health Science Center; a program agreement between offices of the student's department of major study and UT-HCPC; and proof of the student's liability insurance. The practicum student is expected to arrange and complete new UT-HCPC employee orientation prior to the start date of training, even though official employment with the hospital will not be established. Compliance with other periodic hospital-wide training and immunizations is expected as well.

Houston Independent School District (HISD)

Houston, TX

Location: Various locations throughout Houston

Clientele/Experience Gained: Adults, Students, Individuals, Groups (only takes students at the beginning of the year, interviews begin feb. or march for following year)

Duration: 2 semesters (August-May)

Small Steps Nurturing Center

Houston, TX

Address: 1709 Depelchin Street
Houston, TX

Website: <http://ssnc.org/>

Clientele/Experience Gained: Pre-school and young children (severely impoverished, inner-city children) and their families. Classroom observations, individual therapy, play therapy, parent-child therapy, and family therapy.

Duration: 15-18 hours per week; Trainees can start in Fall, Spring

Additional Info: Small Steps Nurturing Center provides comprehensive early childhood education to Houston's severely impoverished, inner-city children. Part of the Center's mission is to prepare at-risk children for the first grade and for life. The center is committed to addressing the needs of students with poor social, emotional, and behavioral development.

Clients are typically children experiencing difficulties with behavior or development, including impulsivity, aggression, noncompliance, anxiety, poor interpersonal relationships, speech and

language delays, and problems with attention regulation. *Note: inquire about supervisor level (e.g., LPC, Licensed Psychologist).

3. http://www.texaschildrenshospital.org/uploadedFiles/Content/Standard_Content/Plan/PracticumApplication_pdf.pdf

Clientele/Experience Gained: Children ages 6-17, ethnically diverse and of various levels of SES. Clinical training opportunities working with school-age children, adolescents, and their families at the Learning Support Center of TCH. Outpatient group psychotherapy, individual therapy, treatment planning, case conferences, topic seminars.

Duration: Approximately 16 hrs a week. Trainees can start in the Fall.

CPSY Approved Field Practicum Sites

Additional Information: The child life practicum at Texas Children's Hospital is designed as a pre-internship experience for individuals interested in pursuing a child life internship and a career as a certified child life specialist. During the practicum, students have an opportunity to become familiar with the child life profession and children's reactions to hospitalization and illness. The program's foundation is to provide the students the opportunity to learn how child life specialists apply theory to practice. Therefore, a large part of the practicum schedule consists of students shadowing child life specialists and other staff through observation to gain assessment skills. In addition, students will also have some "hands-on" experience with patients and families as they plan activities and develop communication skills. *Note: inquire about supervisor level (e.g., LPC, Licensed Psychologist).
